PROFILE

Industrial Engineer and data and automation specialist with 7+ years turning data into decisions and manual processes into automated ones across finance, public sector, e-commerce and international trade. At StoneX I built an LLM enrichment engine that profiles 53,000 corporate clients and cut a process that took a 5-person team weeks to months down to 4 days. I build LLM-powered tools, Power BI and Streamlit dashboards, and SQL/Python/API data pipelines on Azure and Databricks. Experienced in multicultural, fast-paced teams (Colombia, US, China). Native Spanish, advanced English (2+ years of daily international work at StoneX) and fluent Mandarin Chinese.

TECHNICAL SKILLS

Data & BI: Advanced SQL, Power BI, Tableau, Advanced Excel, data modeling, data quality

Programming: Python (pandas, Plotly, Matplotlib, statsmodels/ARIMA, web scraping, machine learning), R, Git, GitHub Actions

Cloud & platforms: Azure, Databricks, SQL Data Warehouse, PostgreSQL, SQLite, REST APIs (Shopify, Google Sheets, Yahoo Finance), data migration QA

Automation: Process automation with Python, LLM pipelines, REST API integrations, scheduled workflows (GitHub Actions), web scraping, automated reporting

AI: LLM-based data enrichment at scale, RAG chatbots (LangChain, FAISS, sentence-transformers), OpenAI and DeepSeek APIs, LLM sentiment analysis, Streamlit apps

WORK EXPERIENCE

StoneX Inc.

Jun 2024 – Present

Customer Insights Analyst

- Designed and built an LLM-powered data-enrichment engine that profiles 53,000 corporate clients worldwide (industry, sub-industry, company size, annual revenue and business description), automating an annual task previously done by hand by a 5-person team: the full run now takes 4 days instead of weeks to months. This became phase one of the firm's cross-selling initiative.
- Wrote a SQL model that unified previously scattered data on the firm's financial instruments into a single view, enabling cross-selling analysis by client and product.
- Built an AI chatbot (Streamlit) that lets sales reps resolve technical questions in seconds; launched as a Latin America pilot with the regional sales team, with Power BI dashboards to monitor usage.
- Developed data-completeness and data-quality dashboards for a large-scale migration of millions of records (thousands of clients, their transactions and daily stock-price history), consolidating the company's databases into a single verified source of truth for all departments.
- Connected API data pipelines (e.g., Shopify) to Power BI, giving marketing near-real-time visibility of campaign performance.
- Integrated data from Azure, Databricks and SQL Data Warehouse through complex SQL pipelines that standardize heterogeneous financial data.

Fondo Colombia en Paz – Ministry of Environment of Colombia

Dec 2023 – Jun 2024

Data Analyst / Business Intelligence

- Automated manual processes with Python, improving operational efficiency and reducing errors.
- Built data pipelines that feed dashboards tracking the status of multiple projects for leadership teams.
- Administered databases, ensuring data integrity, security and availability.

KpitalLink – Miami, FL (Remote)

Apr 2023 – Sep 2023

Data Analyst

- Extracted data with SQL, cleaned and transformed it in Python, and ran statistical analysis and visualizations (pandas, Matplotlib).

- Optimized processes with Python and automated Power BI dashboards and reports in a project-based engagement.
- Ran data-quality checks in Python and SQL and documented analysis processes and assumptions.

GMC Asia (Emerald Trading Company) – Haikou, China

Nov 2019 – Feb 2023

Marketing Analyst

- Identified 300 potential customers on Chinese e-commerce websites through web scraping, doubling prospecting speed and pinpointing the best markets in the country.
- Built and maintained a PostgreSQL product database (features and location), cutting decision-making and logistics time by 50%.
- Proposed and built a Python supply-demand classification process using machine learning, reducing new-client search time by 80%.
- Tracked and managed new-client acquisition with CRM practices.

LaTecne S.A.S.

Dec 2018 – Oct 2019

Data Analyst

- Cleaned and analyzed datasets with SQL across several projects, reducing data errors by 30%.
- Developed Power BI dashboards and reports, improving communication with stakeholders by 40%.
- Supported data models and databases, strengthening data integrity and security controls by 25%.

Fuggle S.A. (Brewing raw-materials supplier)

Jun 2016 – Nov 2018

Marketing Manager

- Implemented an inventory PostgreSQL database, improving decision-making and logistics planning by 35%.
- Expanded the client database by 20% through targeted prospecting and relationship building.

SELECTED PROJECTS ([GITHUB.COM/KAEZAR22](https://github.com/KAEZAR22))

Tradex – Market Analyzer: Streamlit app that screens up to 30 Yahoo Finance tickers, charts technical indicators (SMA, Bollinger Bands, Ichimoku, Chop Zone), forecasts prices with ARIMA and scores news sentiment with an LLM (DeepSeek).

RAG chatbots – Cesar-Bot & HR Assistant: retrieval-augmented chatbots that answer questions from PDFs and text using LangChain, FAISS vector search and sentence-transformer embeddings; my portfolio bot and an HR-policy assistant.

AI Spreadsheet Analyst: Streamlit app on the Google Sheets API with a data-entry form, a KPI dashboard (Plotly) and a chat assistant (OpenAI) that answers questions about the data and returns charts.

Ferment Plan: planning and monitoring app for brewery fermentation cycles on a Google Sheets backend, with automated email alerts scheduled hourly via GitHub Actions.

Headphones Market Analyzer: end-to-end project: web scraping of MercadoLibre listings, data cleaning, exploratory analysis and an interactive Streamlit app.

EDUCATION

Universidad Nacional de Colombia

2002 – 2007

B.S. Industrial Engineering. Relevant coursework: Machine Learning, Data Analysis, SQL, Data Visualization.

LANGUAGES

Spanish (native) • English (advanced, daily international work at StoneX) • Mandarin Chinese (fluent)

ADDITIONAL EXPERIENCE

Chinese Teacher & Interpreter (2010 – 2025): designed curricula from elementary to university level; Chinese-English-Spanish interpreter for engineering projects.

Co-founder, Romulus Brewery (2015 – 2018): business plan, financial projections, production quality control, sales and distribution.

Project Manager, Mindset Group (2014 – 2015): analyzed government data on public schools around Bogotá to diagnose and monitor bilingual-education programs.

Research Assistant, BioGestión – Universidad Nacional (2007 – 2008): co-authored an indexed article on innovation in Colombian SMEs.

AIIESEC Andes (2007 – 2012): Team Leader, Outgoing Exchange Program; exchange participant in China (2008–2009) and Russia (2012).
